Research Interests

FinTech, Empirical Asset Pricing, Micro Market Theory, Machine Learning, Bayesian Statistics, Feature Learning Theory

Education

- Sep. 2023– B.S. in Economics, Mathematics, Computer Science, *Wuhan University*, China.
- Aug. 2025– Visiting Student, *Duke Kunshan University*, China.

Projects and Research Grants

- Sep. 2024– Nighttime Lip Reading Recognition Based on Deep Learning.
Research project focusing on computer vision and deep learning applications for lip reading in low-light conditions.
- Jun. 2025– The Quantitative Project of Zmate, *Factor Identification Based on Price-Volume-Return Relationship and Its Delay Variants*.
Quantitative finance research project analyzing market microstructure factors.
- Jun. 2025– Research work based on P-trees.
Reference: Lin William Cong, Guanhao Feng, Jingyu He and Xin He. “Growing the Efficient Frontier on Panel Trees.” *Journal of Financial Economics*, 167 (2025): 104024.
- Aug. 2025– A Survey and Python Module Regarding FLT, *Feature Learning Theory*.
Comprehensive survey and implementation of Feature Learning Theory with practical Python applications.
